

Wundermart Shop Opening – Preparations and Next Steps

Dear Sir/Madam,

It is a pleasure to e-meet you! We are excited to open a Wundermart shop. Below, you'll find the key information and next steps for the opening.

Preparations

To ensure a smooth installation process, please ensure the following are in place:

- **Internet & Power Supply:**
These must be ready and functional according to the **technical drawing**. Please arrange for the installation of the necessary elements with your internal or external team.
 - **Site Readiness:**
The designated area should be **clean, accessible, and fully prepared** for installation.
-

Payment Terminal

- Provide a **wired internet connection** within **1 meter** of the terminal.
- Ensure a **minimum network speed of 10 Mb** and share the **speed test results and IP address** with me for review ([test via this link](#)).
- The kiosk uses a **192.168.1.x IP range**, so please ensure the connected network provides an **IP address outside this range via DHCP**.
- **Ports used:**
please ensure that your IT department or ISP are not blocking or restricting any of the following;
 - 4500 TCP outgoing (VPN)
 - 500 TCP and UDP outgoing (IKE-VPN)
 - 29811–29814 TCP outgoing (Omada discovery)
 - 29810 UDP outgoing (Omada discovery)
 - 9092 TCP outgoing (Kafka)
- **Power Supply for the POS:**
Please confirm from where the internet connection for the POS will be provided (**ceiling, wall, or floor**). Once confirmed, our building partner will prepare a suitable conduit accordingly. Please note that **an electrician must be onsite to handle the wiring**, as our team is not authorized to perform electrical work.

For the Fridge(s):

- **One electricity outlet per item.**
 - **In case of more than one fridge, each must be connected to a separate electrical circuit.**
-

For the Double Sided Shelving Unit (Mid-floor):

- **One electricity outlet per item.** Please confirm whether the **power will be supplied from the ceiling, the wall or the floor.**
